

*Kindness and Care for Animals®*

## **Veterinary Technician/Assistant – Anesthesia Angell West**

MSPCA/Angell West is seeking a Certified Vet Technician or Assistant for our busy anesthesia department located in Waltham. This position provides a unique opportunity to practice in an intimate client-focused setting. We are a values based organization with a focus on client service, patient care and life-work balance. This is a wonderful opportunity for a technician or assistant who are seeking a smaller hospital based setting.

The Veterinary Technician or Assistant in Anesthesia plays an essential role in the daily operations of our very dynamic and fast paced Surgery and Anesthesia departments. Applicants should be able to work independently while maintaining a positive and enthusiastic attitude. Strong communication skills, empathy and compassion for the animals in our care are needed to excel in this position.

This full time position (always a guaranteed 40 hours a week!) has a rotating schedule including weekends, occasional holiday coverage, and paid on call responsibilities.

We have a competitive salary - which is commensurate with education and experience. Our compensation package includes health, dental and life insurance, 403(b), tuition reimbursement, uniforms, paid holidays and vacation, employee discounts for pet health care, and pet food!

### **Applicant Requirements:**

#### **Education**

- Bachelor's or Associate's Degree in Veterinary Technology from an AVMA accredited Veterinary Technology program.
- To be hired as a technician, you must be a Certified Veterinary Technician
- Recent graduates with certification and significant externship anesthesia related experience will be considered as an assistant.

#### **Experience**

- Minimum 1 year veterinary technician experience, preferred if CVT qualified.
- Minimum of 2 years of surgery/anesthesiology or equivalent required if not CVT certified.
- We are looking for technicians or assistants with advanced technical skills including but not limited to: venipuncture, IV catheter placement, central line placement, intubation, anesthesia, CPR procedures, chest tube and tracheostomy maintenance, IV fluid administration
