### Who we are and what we do:

Cornell University, located at the heart of the beautiful Finger Lakes Region of New York State, is a center for discovery, academic leadership, and service. The College of Veterinary Medicine (CVM) is recognized internationally as a leader in animal medicine, public health, biomedical research, and veterinary medical education. Ranked as one of the top veterinary colleges in the nation by US News & World Report, the CVM excels in providing education and advanced training that prepare veterinarians and scientists to serve society in critical roles in clinical and diagnostic veterinary medicine, public health, scientific inquiry, and public policy.

Cornell University Hospital for Animals is our core clinical training, patient care and research unit within the CVM, composed of six diverse world-class veterinary clinical units providing primary and specialty care. Our core teaching hospital has 23 services led by board-certified veterinary specialists that are nationally and internationally renowned, providing advanced diagnostic and therapeutic care of animals including 24/7 emergency care. We strive to provide a

diverse, inclusive, and fulfilling work environment for our family of employees who are committed to outstanding patient care, client service and veterinary training.
